DATE / LOCATION

MARCH, 2025

In March 2025 , we'll be traveling for a unique experience to the Netherlands and see first hand how the players are being developed. Through this experience our players will have the chance to train with psv coaches and have a direct showcase where they can express themselves

NETHERLANDS

ABOUT PSV

PSV has a strong history of success and an impressive list of achievements. They first captured the Dutch title in 1929 and won their first title after the introduction of professional football in 1963, after a 5–2 victory. In total they became champions twenty-four times and won the KNVB Cup eleven times. PSV also won the national Super Cup fourteen times.

PSV has been participating in European competitions since 1974. The first highlight was winning the UEFA Cup in 1978, in which Willy van der Kuylen played a major role.

**LET'S GO
LET'S GO**

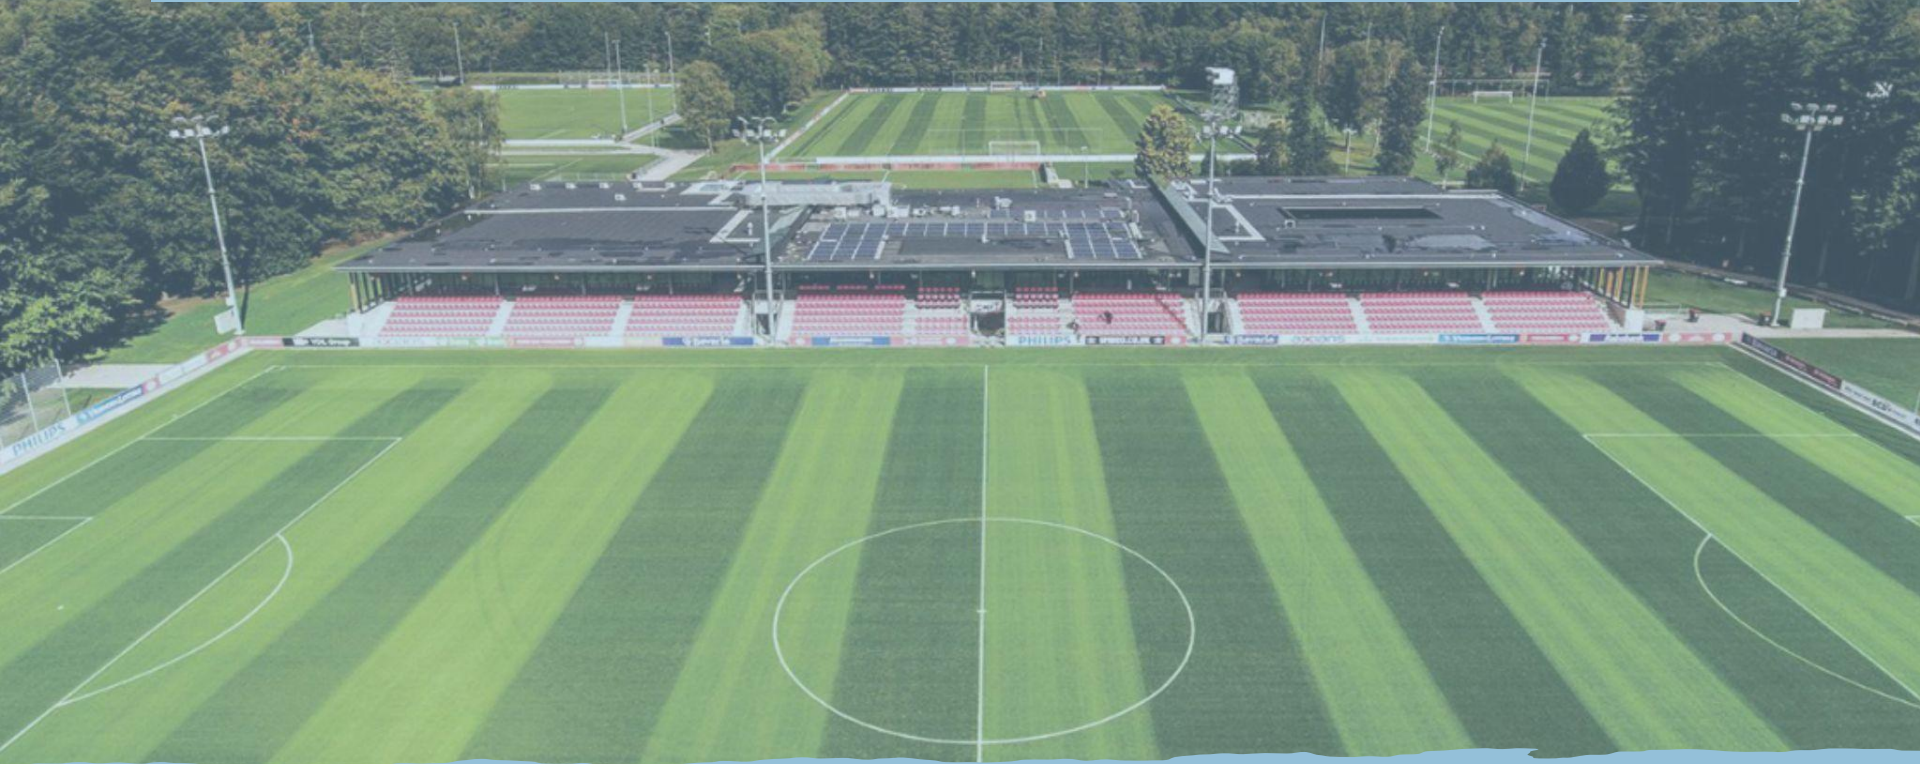

To achieve PSV's sporting ambitions, the club's own youth academy is of significant importance, especially considering the financial differences between the major football countries in Europe and the Netherlands. The objectives of the youth policy, which has been reinforced since July 1, 2013, primarily focus on the transition of youth players into the PSV A-selection.

Individual talent development takes center stage within the PSV Academy through six developmental pillars. This process involves intensive personal guidance and employs innovations in various areas. For each player, the aim is to reach their personal football ceiling within a high-performance environment, where the PSV culture is preserved within the playing style and a unique way of working
